The Northern Lights Physics Conference 2022 is an international physics conference hosted by the Next Generation Partnership Network of the Universität Hamburg on the interplay of (quantum) magnetism, topology, and superconductivity, focussing on novel physics and applications to tomorrow's quantum technologies. The conference will be held in Iceland's capital Reykjavík at the National Museum of Iceland on October 12-15, 2022 and includes 32 invited international speakers and contributed posters.

Organizers: Benedetta Flebus, Mircea Trif, Thore Posske

Local co-org.: Sigurður I. Erlingsson, Andrei Manolescu, Viðar Guðmundson
